The only hard part to learn is the use of layers, which are overlays on top of one another to give you unlimited control over your image. Photoshop's structure of layers makes it perfect for virtually any kind of image editing. You can manipulate the layers of an image and see your results immediately.

Layers can be combined, merged, moved, and rotated to achieve new effects. An image can be sliced into thin sections to give it a 3D look. This book teaches you how to use Photoshop to edit photographs, create graphics, and make artistic images for the web. Introduction Photoshop is Adobe's flagship product. Emergency crews in Port Sarnia, Ont., were called to an oil spill in the Channelview Bay near the town of Sarnia Tuesday evening. And the spill has not stopped, though the weather is supposed to be clear overnight. Officials from the Sarnia & District Health Unit said there is no immediate threat to the public. Brenton Pexon, information officer for Environment Canada, said a crude oil slick has been sighted in the area. The slick is about a hundred metres long and 50 metres wide, he said. "The weather is not co-operating right now so we expect to see this kind of activity continuing through the day," Pexon told CBC News. "What's concerning is [that] none of the Coast Guard assets in port right now are actually actively responding to this spill." But he said the Coast Guard will be out overnight in the boat, along with contracted tankers and tank-truck drivers. Shell Oil Canada said it was aware of the spill and was monitoring the situation. "Our environmental and marine response teams immediately began assessing the situation, and the major cause of the spill was determined to be a damaged pipeline. We have dispatched an engineer to the area to assess the situation and we are working with local officials," Shell said in a statement. Shell said the pipeline was damaged during installation for a local contract. "We are cooperating fully with the Sarnia & District Health Unit, local officials, the province and all enforcement agencies, and we will continue to work closely with them to assess and contain the spill until it can be fully addressed," the statement said. A spokesman for the Department of Fisheries and Oceans said the department's marine section was dispatched to the area and along with Environment Canada staff are monitoring the situation.
