Sony FMP P-CAM SP790 DVD Recorder | White

This is a pretty basic DVD recorder that is mainly suited for home users. It offers a range of useful features such as dual tuners, menu templates, wireless transfer and the ability to edit and rename videos. Since there are no extra features that separate the SP790 from other products in this price range, we recommend you look elsewhere for something more advanced. This DVD recorder retails for about £240, which is fairly expensive. But the competition in this price range is weak, with only Sony offering anything that is worth considering.

The Sony FMP SP790 DVD Recorder

The Sony FMP SP790 is a basic DVD recorder, combining functionality with a better-than-average interface. It might be a little tough to set up initially, as it lacks many of the more advanced features that are available in other products at the same price point. But once you've done this, you'll be happy that you made the upgrade. The Sony FMP SP790 is quite a simple DVD recorder to use, comprising a fairly straightforward menu system that allows you to quickly navigate to your favorite chapters and recordings. While many DVD

recorders let you do this by pressing buttons on the remote control, it's quite a shame that the Sony FMP SP790 doesn't offer any more of a feature to make this easier. There are also no extra DVD titles to record, and no built-in parental controls, which is something that's becoming more common on DVD recorders. However, the Sony FMP SP790 does get points for being wireless, as it can record wireless network feeds from your laptops and other devices. As well as being able to record from TV broadcasts, this recorder also lets you use it to record from streaming services like Netflix. There are eight individual tuners on the Sony FMP SP790, allowing you to record and watch separate copies of the same program at the same time. Since the Sony FMP SP790 uses the older D-AVC video compression

What's New In?

Crystal Player Pro is a powerful media player that you can use to view movies. It supports several file types, including 3GP, ASF, AVI, DIVX, FLV, MOV, MP4, MPEG, MPG, RMVB and WMV. The user interface is very appealing (consists of glass and shadows), but navigating through Crystal Player Pro can be a bit tricky - buttons are very small, and you have to hover your mouse and wait some time for the title to appear. We tested this product on Windows 7. Unfortunately, it could not open 3GP, FLV, MP4 and MPG files in our case (the error says "Can't locate video stream"). But when you drag and drop video files into Crystal Player, the application automatically creates a playlist (you can sort by title, full path, reverse, or randomize). In Crystal Player Pro, you can toggle color control, adjust brightness, contrast, hue, saturation, sharpness, equalizer, but also apply filters - soften, sharpen, gray scale, auto volume, remove voices (a feature that is not

well developed), add base, and accent stereo. Additionally, you can attach audio to a video file, change aspect ratio, capture an image, zoom in and out, select language, add and customize subtitles (font, color, transparency, shadow, fade out). You can also check out the help file for any information or guidelines on how to use Crystal Player Pro. In conclusion, Crystal Player Pro is a decent media player, but it definitely needs some touchups (e.g. support for additional video formats, better integration of features). Also, it uses a high amount of system resources. Crystal Player Pro Themes... 4.0 out of 5 starsNeeds Work This is a good product but it does not play.3gp files i tried installing some codecs and tried 4 different players (vlc, vlc-plugin-esd, mplayer, media player classic) but no matter what the pc will open the file but the video is incomplete and when i click pause it closes. the video playback will work for a second then stop and leave the file incomplete. I have been trying to fix this for a week now and have spent a LOT of money on freepcsoft.7, codecs, drivers etc. I have posted on the freepcsoft forums and received no response. Does anyone know a software that will play.3gp files
